### RATHER SINGULAR.

Yesterday evening as the Rock Island train from the south showed up at Haysville to take on the mails quite a number of siles were thrown through the car windows. Several of the passengers were in jured slightly and the porter of the Pullnan received a severe gash on the head. The whole affair is a mystery and none of the train officials can account for the attack. There were undoubtedly several assailants, but who they were and what motive prompted the act is yet unknown. thought of for the comfort and convenience It is 60x73, furnished in oak and the walls Officers were sent at once to investigate the matter which will likely be unravelled in Furnishings-All of the furniture was It has an easy seating capacity for two a few days. Train only stops at Haysville on special occasions and takes the mail while in motion which fact may be the origin of the trouble but this theory is not onsidered plausible by the officials.

> W. A. Martin-I have spent a good portion of my time for the past year in working up the John Bright university. I have made several trips east and have met with a great many difficulties, but think now that I will make a success of it. Much of the delay has been caused by the apathy of the people directly interested in the location. Had they done their duty the ques-tion would have been settled long ago. As it now stands the money is about all subscribed, and I expect soon that \$160,000 will be secured, which is the amount that the plans call for. That amount expended in buildings and improvements at this time would be very acceptable.

M. W. Levy-I have noticed of late oils every week. Up to recently the only station of the company in the state which virtually was the distributing point for the state was at Kansas City, Kan. It was discovered that when a person complains of any allowed this, that, or the other kind of mineral that was at Kansas City, Kan. It was discovered that when a person complains of any was discovered that when Wichita drug store are filled with bottles of water secured distributing rates giving encouragement to the wholesale interests of try, which leads me to think that the wat the city and made it an inducement to er cure is becoming more popular every distribute from this point, the Tank Liue company could be benefitted by making Wichita, with her usual good fortune, will be the company could be benefitted by making with the control of the control o this a distributing point as well as those engaged in other business.
